Design Services

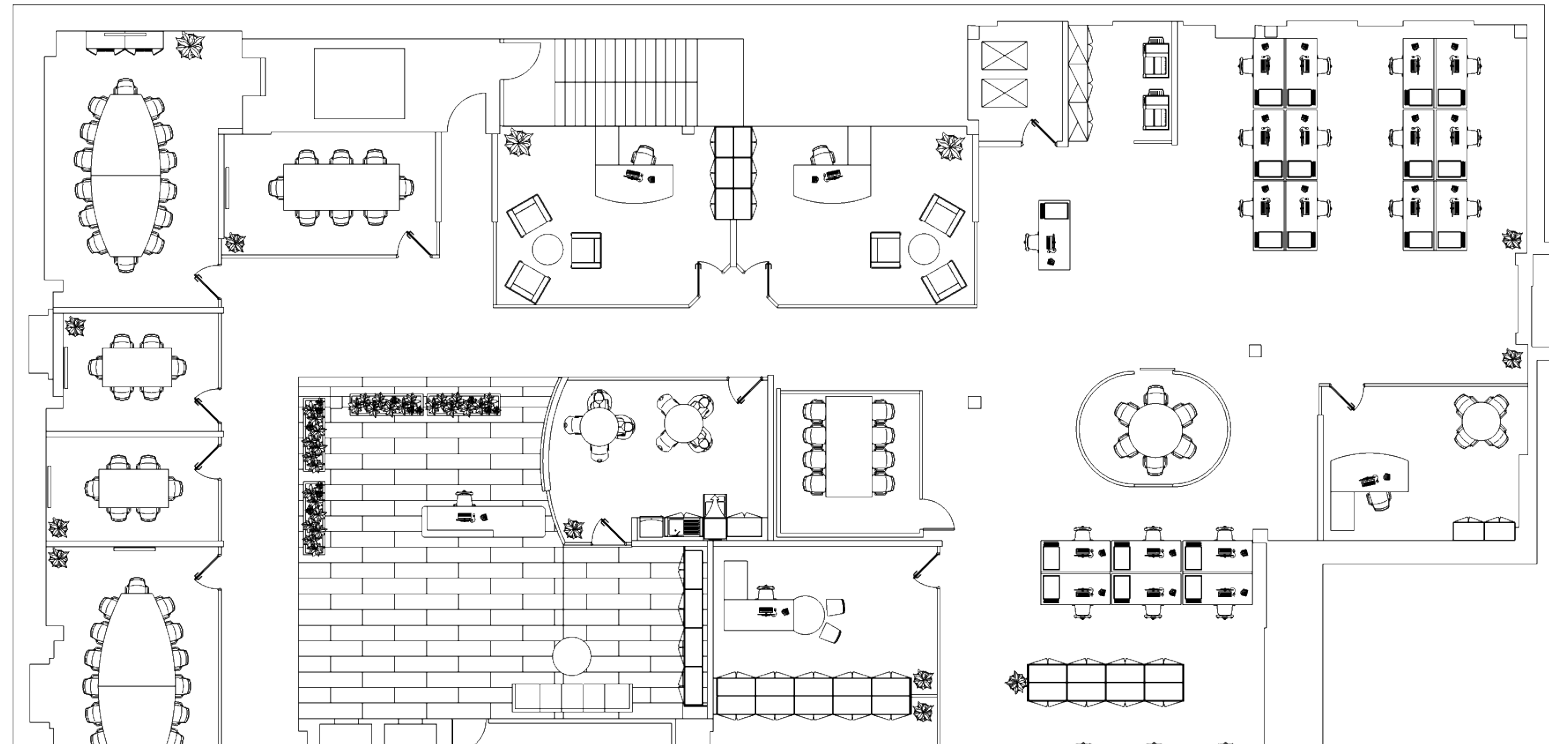

By combining our CAD (Computer Aided Design) capabilities with our extensive knowledge and experience of the office furniture and interiors sector we are able to offer independent and impartial help with the design and planning of your boardroom and meeting space.

Following our initial consultation to define your objectives, we will carry out a survey to take the initial dimensions, note positions of windows, radiators, doors and columns together with any other elements we believe might be crucial in maximising the use of your floor-space.

We have three stages for designing your office space that consist of Consultation, 2D & 3D Layouts and Fully Rendered Visuals, to help determine your needs.

2D & 3D Layouts

Following any amendments that may be required, we can then undertake to produce a 3D view showing a number of different perspectives, this allows you to visualise your office from any angle and helps to overcome many of the objections that can occur when planning a major refit or relocation.

Rendered Visuals

Subject to approval of the previous stages, we can then assist by producing fully rendered 3D views of your workspace. Now we can start adding colours to the office furniture products as well as wall and flooring finishes to allow you to view your finished office, this process allows you to make changes at the planning stage prior to the start of a project and has proved beneficial to many clients.

Whatever the dimensions of your office space, or the size of your budget, we can provide bespoke office storage solutions where it matters the most. Our office storage can be made from a wide array of materials including functional Melamine or Laminate and Natural Veneers, as well as MDF spray painted to match any corporate branding.

Concept to Completion
